Counterbalance Forklift Training Tempe

Counterbalance Forklift Training Tempe - Demand is always high for our popular Counterbalance Forklift Truck Training courses. A Counterbalance forklift is a forklift with a weight which counters the balance, allowing the load's weight to be distributed equally across the arms of the forklift. Counterbalance forklifts are made so the weight on the lift is counterbalanced by the weight behind the centre of gravity. The load is projected out from the front of the equipment so it is visible to the driver of the forklift. This kind of forklift truck must only be used on prepared surface or on level, stable ground.

Forklift drivers are needed to receive training that will allow them to better understand the proper or right method across the arms of the forklift. The trainee would be taught to correctly lower and raise the load vertically and how to tilt the mast of the lift truck, moving the mast between 5 and 15 degrees both backwards and forwards. Individuals training would know the RTITB standards required for safe forklift operation. Trainees would also become familiar with the kinds of attachments for the arms of the forklift.

Types of Counterbalance Forklifts:

Walkie Pallet Trucks
Walkie Pallet Truck is a counterbalance forklift suitable for getting into areas that are small and cramped. This particular lift is very maneuverable and capable of accessing practically every tight spot.

Walkie Stackers
The Walkie Stacker varies from the Walkie Pallet truck primarily in terms of lift height. The Walkie Stacker could access tight areas and has extra lift for high stacking capability. None of the Walkie line of lifts could be ridden. The driver has to walk behind them.

Rider Pallet Trucks
Rider Pallet Trucks are designed to be ridden. These riding lifts are great for dock loading and unloading.

Wave Work Assist Vehicle
The Wave Work Assist Vehicle is a counterbalance forklift meant to reach great heights of as much as 17 feet.

Sit Down Counter Balanced Trucks
The Sit-down Counterbalance Forklift is made in four-wheel and three-wheel forklift designs. These durable and tough trucks are made to be ridden.
