We provide forklift training certification, lift-truck operator driver safety training evaluation, and train the trainer programs provide regulation-compliant, thorough training in industrial-powered fork truck safety and utilization. Lift truck pedestrian safety is offered too.

We have a highly competent group of expert trainers to be able to make certain that your staff are well-trained. The certification is delivered on site by one of our certified instructors. Individuals training will learn how to recognize dangers and perform safety inspections needed for the safe and effective utilization of a powered industrial lift truck.

Forklift Training Guidelines
The following checklist is vital for whichever workplace which has forklifts on the premises. Each of these questions should be answered with "yes" if all the safety rules and regulations are being followed. A "no" to whatever question indicates a procedural weakness that might result in accident, injury or damage to equipment.

1) Is the forklift operating area separated from pedestrian traffic?
2) Is pedestrian access to forklift travel areas restricted by barriers?
3) The pedestrian walkways well-marked?
4) Are "forklift in operation" signs visibly clear?
5) Are mirrors for pedestrians and drivers provided at blind spots?
6) Changes or alterations to the daily forklift schedule has been communicated to employees?
7) Are forklift tires suitable for use on all operating surfaces?
8) Is the seatbelt being utilized?
9) Is the seat in good condition?
10) The maintenance schedule of the forklift is being followed?
11) Are annual checks of the forklift being done?
12) Is the type of forklift appropriate for the tasks?
13) Does forklift has a load chart that is readable?
14) Do all operators understand how to read the load chart?
15) The chart lists the safe lifting capacity for all attachments and their uses?
16) Do the forklift warning devices work right?
17) Is the operating speed control device fitted right?
18) Is overhead cage fitted right on the lift truck?
19) Do the operators of the lift truck have certifications to operate the machine?
20) Warning signs and speed limits are being observed?
21) The operators have current training for the lift trucks being used?
22) Forklift operators know their duties to report the damage to the machine and other lift truck accidents?
23) Prior to the machinery being used, the pre-test checklist is being reviewed every day?
