

Manlift Ticket Tempe

Manlift Ticket Tempe - The Elevated Platforms and Manlifts Certification program helps to provide the required training on the work practices, safe operating procedures, rules and regulations regarding the everyday activities for the operators of this equipment. The program has been designed for people who are actively involved in these activities or those who have a basic knowledge of this machine.

In the last couple of decades, aerial platforms and manlifts have become a common sight on construction job sites and in industrial maintenance applications. These machines provide an easy way to lift workers near what must be done on a stable platform apparatus, enabling staff to do tasks with greater safety and comfort rather than being perched on top of scaffolding or ladders.

Like every other device, manlifts are just safe if they are utilized correctly. As they elevate employees above ground level or floor, accidents could easily take place and this can lead to serious fatalities or injuries for both the operators of the manlift and any passerby who may not be lucky enough to be standing underneath.

There are various types of manlifts. Most fall into 1 of 2 categories: the articulating boom lift, that has the capability of both vertical and horizontal movement and the scissors lift, that is capable of moving upward and downward.
