

Boom Lift Training Tempe

Boom Lift Training Tempe - Elevated work platforms, also known as aerial platforms, enable workers to perform jobs at heights which will otherwise be not reachable. There are various types of lifts intended for various site conditions and applications. If not carefully operated, elevated work platforms could cause serious injury or fatality. The most common causes of related accidents are falls, electrocution, crushed body parts and tip-overs. Lift operators must be trained completely in techniques to prevent accidents during the operation of lifts.

Aerial Lift Safety course is intended for people who must operate the devices more effectively and safely. The course provides thorough instruction on the most used lifting devices in the industry.. Kinds of lift covered consist of boom supported, scissor and articulating aerial lifts. The video presents the proper procedures operators must follow. Instruction focuses on protection against falls, pre-operational inspection, safe driving procedure and stability of the device.

The boom lift training course would help to deal with employee safety and equipment reliability, utilizing materials that are fully compliant with your regional and local regulations and requirements. Course management and training techniques would be taught. The trainer will likewise become well versed in the technical aspects of aerial lift safety.

Parts of the Boom Lift Training course consist of both practical training and classroom training. Both sessions should be successfully finished for the participant to be given a certificate of achievement.

The difference between self-propelled elevating work platforms and self-propelled boom-supported elevating work platforms is that, on the latter type, work platforms could be positioned completely beyond the base of the machinery. The theoretical training part is practically the same for both kinds. The practical part of the training can be finished sooner if just one kind of machine is used.

Elevating Work Platform Training Program Objectives:

For the safe operation of Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training will help operators use their machinery more effectively and will decrease the possibilities of accidents in the workplace. Trainees will review of applicable rules and business policies, talk about Due Diligence, review Criminal Negligence and consequences to trainers, employers, supervisors and workers. Participants would review machine features, operating procedures, stability, parking and charging/fueling procedures. Site-specific safety issues will be addressed.
